

MVO: "Climate change affects us all. That's why the government is investing over 2.8 billion dollars to tackle the problem, including the development of new sources of energy."

Woman: "I can't build a solar plant, but use the sun instead of my dryer? I can do that."

MVO: "We've developed new ways to make coal cleaner."

Man: "I don't know much about clean coal, but change to energy efficient light bulbs? I can do that."

MVO: "We're supporting new clean power stations that use geothermal heat from deep down in the Earth's crust."

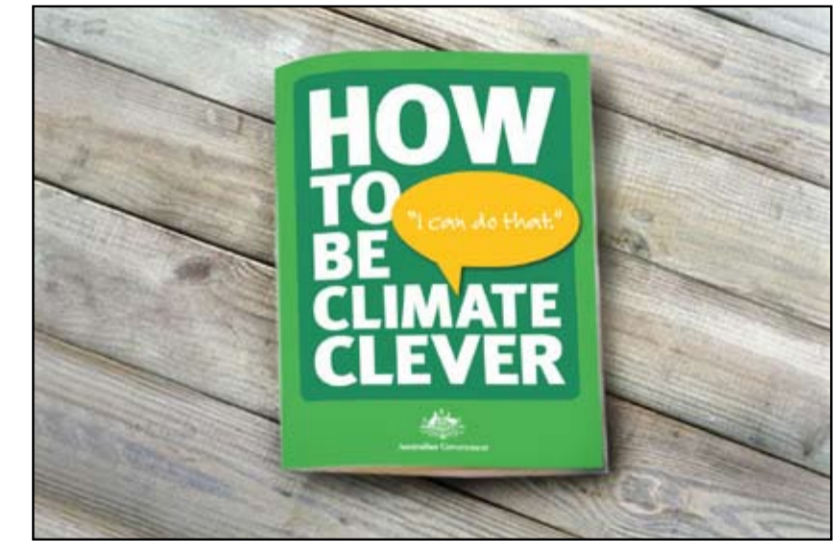

Old lady: "I can't help geothermaging, but only boil the water I need? I can do that."

MVO: "And we're supporting scientific research to find better solutions to climate change – for now and into the future."

Woman: "I'm no scientist, but switch off my PC at the wall? I can do that."

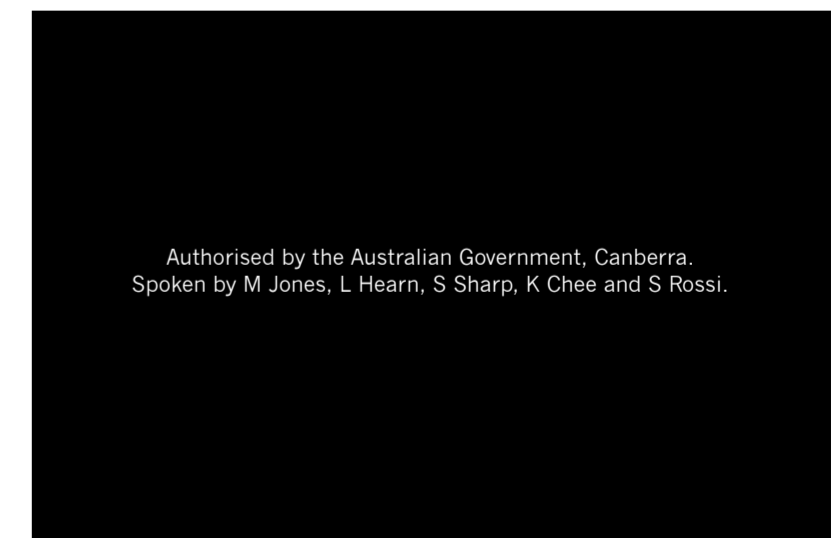

MVO: "Together we can be Climate Clever. That's why we're sending every household a handbook showing the many ways we can all work together to tackle climate change."

Man: "Walk the kids to school? I can do that."

Girl: "I can do that!"

MVO: Authorised by the Australian Government Canberra.
